#1

Microsoft is the most phished brand in the world for 5th straight quarter (Q2 2019)

Enterprise-grade protection that works to prevent data breaches, malware, phishing attempts, and account takeovers.

01 DATA SECURITY

- 256-Bit encryption in-transit and at-rest data security
- Detect and control accidental and/or malicious data leaks
- Data loss prevention with customization policies
- Layered Redundancy – ensures secure email storage across multiple networks.
- Secure Servers
- Two Factor Authentication / OTP
- Pattern-based encryption

02 THREAT PROTECTION

- Malicious Attachment Blocking
- Anti-Phishing Policies
- Protection against advanced malware and phishing attacks
- Email domain, attachment, and links screening and quarantine
- Malicious files, and folders screening and quarantine
- DMARC Domain Fraud Prevention
- Whitelist/Blacklist Policies
- Automatic Signature Disclaimer
- Network Redundancy

03 ACCOUNT MONITORING

- 24/7 U.S based support
- Real-time Reporting
- Receive alerts via email/text when unusual activity is discovered
- Full visibility into login locations, sharing and downloading activity
- Detect and control unsanctioned applications with risky permission settings
- Automatically prevent account takeovers with policy enforcement rules
