ExchangeDefender Email Archiving solution provides secure, long-term storage, recovery, and eDiscovery that assures compliance with regulatory requirements established by IRS, HIPAA, SOX, and SEC.

ExchangeDefender Email Archiving uses the latest Microsoft Windows Server and Microsoft SQL Server technology to archive, index and replicate your messages safely and securely. All data is further encrypted and backed up offsite to assure ultimate resiliency in case of a disaster.

Our Email Archiving solution also includes:

Encryption: Your business data is encrypted both in transit, and at-rest.

End-User Access - Our clients receive access via their own online portal.

Support: We are available for via phone, chat, and support portal.

Data loss prevention: We ensure secure email storage across multiple networks.

Journaling Technology: Full archiving of inbound, and outbound email.

Reporting: Save advanced searches, have consistent discovery, monthly.

ExchangeDefender Email Archiving securely archives email to safeguard intellectual property, and ensure regulatory compliance.
