

CORPORATE ENCRYPTION FOR HEALTHCARE

Enables secure, HIPAA-compliant sharing of patient PHI with end-to-end encryption.

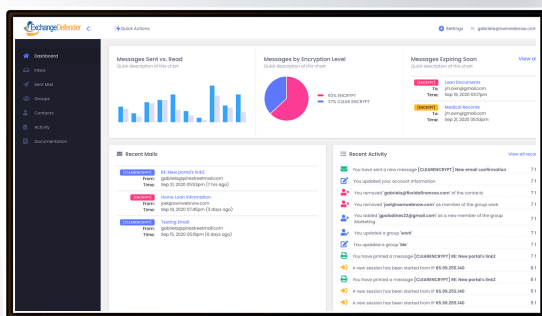

Healthcare professionals can easily send and receive secure messages with **ExchangeDefender Corporate Encryption**. Communicate sensitive data with confidence using a powerful, user-friendly web interface that can auto-detect personal identifiable information (PHI) like patient names, date of birth, lab test results, medical bills, and more!

DESIGNED TO HELP YOU:

- Securely send and receive secure messages for sensitive patient information
- Prevent accidental data leaks of protected health information
- Maintain control, and full visibility of all data that is shared
- Achieve compliance with HIPAA, and HITECH regulations
