New Message Configuration Parameters:

- Notify me when the recipient reads this message
- Email me a copy of this message
- Destroy this message after it's been read
- Automatically destroy this message after # days
- Notify this user when the recipient reads this message (type the email address)
- Password protected messages

ExchangeDefender Corporate Encryption offers two levels of Encryption.

Encrypt: Encryption provides the highest level of message protection. It requires the email recipient to enroll with ExchangeDefender, and provide additional authentication (PIN) on top of the encryption.

ClearEncrypt: Encryption provides a standard level of encryption that never transfers message contents in plain text. Enrollment is not required by email recipient.
