Introducing ExchangeDefender Inbox

Inbox provides a safe email alternative that helps keep things 'business as usual' during email outages, and technical difficulties. Inbox is an email service that automatically activates whenever your Outlook or Gmail goes down.

Compose, reply, and forward email

Inbox is an exact copy of your current email in real-time. You can send, receive, and forward emails seamlessly.

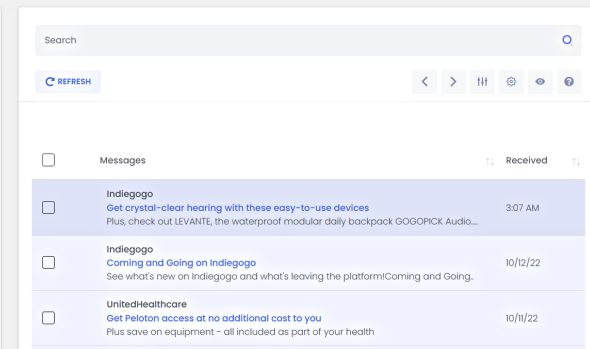

Send secure messages with on demand encryption

Send sensitive email directly with built-in Encryption, protected by SSL certificates, and 2FA/MFA security standards.

Bypass misconfigured IT policies, IP blocks, and RBLs

Inbox ensures that every email is delivered. Work around RBLs, IP blocks, and email bounces with our built-in Bypass tool.

Email emergency? No problem, with Inbox!

Make Inbox your go-to plan for when things go wrong with your email.

24/7 email access

Enjoy 100% email uptime. Inbox is online even when your email is down.

No IT required

Inbox is user-friendly, and requires no downloads, or expertise.

Works on any device

A cloud based solution, Inbox is compatible with any device with wifi.
