

Business Continuity that is constantly archiving your sent and received mail.

Organizations are constantly facing internet and email outages, maintenance cycles and service unavailability. The key to productivity is being able to access your email even when outages happen – Exchange Defender LiveArchive Business Continuity is the solution.

As you send and receive email, we make a copy and store it on our network – when you experience an outage you can just pull up a webmail system on your computer, tablet, or phone and continue where you left off.

Live Archive Highlights

Real Time Archiving

LiveArchive is always on, archiving emails in real-time powered by our mail systems with data center redundancy.

One Year Storage

Receive up to 1 year of inbound and outbound mail accessible via our LiveArchive website.

Secure Servers

We offer business continuity using our secure standby servers to archive emails in real-time.

No Installation

Say goodbye to software installations and manual switches. LiveArchive does not require management or maintenance.

Sync Ready

Our solution enables you to sync and manage your contacts, calendars, and appointments in Outlook.

Mobile Friendly

Access your emails in LiveArchive securely via your mobile device. Static Slider Title: Business Continuity that is constantly archiving your sent and received email.

Access your email via the cloud when outages happen.
