

WEB FILE SERVER

Built for modern workplace sharing and file storage

ExchangeDefender Web File Server is a professional file sharing software that features secure file sharing, and collaboration for business and client information. WFS provides a central location to securely store, manage, and share files with anyone using a user-friendly web interface.

Central Dashboard

Reviewing new documents, uploads, and comments is a breeze with our portal.

Unlimited Storage

Upload unlimited files, create libraries, and add unlimited recipients, contacts and groups.

Live Reporting

Full audit reporting of all user activity. Receive alerts via email or text of unusual activity.

DESIGNED TO HELP YOU:

- Upload, manage, and share files securely
- Prevent accidental data leaks of business or client information
- Secure intellectual property
- Control sensitive information sharing

TOP FEATURES:

- Easy to use, no training required
- User access control
- External client access
- Password protect libraries
- Content expiration

KEY BENEFITS OF WEB FILE SERVER

Data Protection

128bit encryption for data protection, security settings for users, and advanced controls for admins.

Real-time Collaboration

Seamless collaboration in real-time inside a secure, and policy controlled file storage and sharing portal.

Client Access

Let your clients upload, or view documents using preset access controls, without having to sign up.
