

## The Regulatory Compliance Suite **automates** GDPR compliance for small business.

### Corporate Data Archiving & Encryption

Exchange Defender's helps organizations comply with GDPR by automating detection of sensitive private information, EU client data, consent tracking and powerful audit & policy wizards that alert you to potential issues.

## GDPR Compliance Made Simple.

---

### Encrypt Client Data on Demand

Our encryption feature is easy to use requiring no additional software, no configuration, or install. Simply send an email like usual and add [ENCRYPT] in the subject line.

### Intercept and Review / Encrypt Sensitive Data

Corporate encryption can automatically encrypt messages or forward the contents to the administrator for the corporate review. Our Strict Encryption [ENCRYPT] has an added layer of security requiring a password and 4-digit pin for secure access.

### Automatically Detect Sensitive Private Information

Pattern-based encryption that can detect credit card numbers, social security numbers, dates of birth and other sensitive private information.

### Use Message Content Filters To Restrict Sharing

Lexicon dictionaries can contain words and word patterns that indicate someone is sending user data, automating eDiscovery.

### Comprehensive Reporting

Comprehensive reporting of all email activity as well as a Compliance Officer (CO) reporting with search capabilities provide proof of regulatory compliance and simplify reporting, audits, discovery and shift liability for message storage, access and destruction.

# How it Works: Corporate Encryption

ExchangeDefender Regulatory Compliance Suite enables organizations to automate GDPR compliance by detecting and protecting sensitive content.

## Compliance Archive

Provides a fast and secure environment to store, process and index your entire mailbox and keep it accessible for up to 10 years. eDiscovery of Sensitive Private Information helps automate your GDPR compliance reports and Data Protection Officer DPR/DPO inquiries.

### Corporate Archiving & eDiscovery with **GDPR**.

---

#### eDiscovery & GDPR

Our built-in eDiscovery system makes it easy to search across multiple mailboxes to locate any sensitive private information, source or consent.

#### Secure Long-Term Archiving

Compliance Archive gives Compliance Officers access to 10 years of mail, allowing eDiscovery reporting to find sensitive personal information and original consent quickly and easily.

#### GDPR & Message Protection

Compliance Archive assures you that none of your messages have ever been tampered with, deleted or otherwise hacked to hide data leaks.

#### Comprehensive Reporting

Compliance Officer features allow you to save advanced searches, execute them in the background and have consistent discovery month-to-month

#### Easy to Use

Our Compliance feature is easy to use requiring no additional software to install, configure or manage.

#### Mail Journaling

Exchange Journaling Technology assures full archiving of all inbound, outbound and internal email.
