

# ExchangeDefender Migration Service

ExchangeDefender (Own Web Now Corp) Migration Services (EMS) is available for companies that are looking to switch email providers to/from ExchangeDefender and Microsoft/Office 365, Google Gmail, and other approved Microsoft Exchange providers. If you are uncomfortable executing this process yourself, ExchangeDefender can help you execute a migration with two service tiers:

## ExchangeDefender EMS – Data Export

ExchangeDefender EMS will connect to the existing mailbox and export all mailbox data including email, notes, calendars, and journals. All data will be exported to a standard Microsoft Outlook PST file. Data will be provided to the client either via secure web site or an encrypted USB hard drive.

Pricing: \$39 / user

---

## ExchangeDefender EMS – Mailbox Migration Service

ExchangeDefender EMS will connect to the existing mailbox and export all mailbox data including email, notes, calendars, journals as well as all public folders and shared mailboxes. ExchangeDefender EMS will then establish an MX record to assure real-time delivery both to the source as well as target email infrastructure. After all the mailboxes, folders, and permissions have been confirmed and data moved to the new provider, ExchangeDefender EMS will conduct a review with the client to confirm everything is operating correctly. ExchangeDefender EMS service includes pst export, DNS management during the move, mailbox move with 0 downtime, configuration of SPF/DKIM records, and technical support for 90 days for any issues related to the migration and data move.

Pricing: \$59 / user

# ExchangeDefender Migration Service

ExchangeDefender EMS can only be requested by the legal owner of the data (mailboxes):

**Please select service type:**

- ExchangeDefender EMS – Data Export - \$39 /user
- ExchangeDefender EMS – Mailbox Migration Service - \$59 /user
